PP HOMOPOLYMER

DESCRIPTION

SABIC[®] PP 576S is a PP homopolymer grade that has good flow properties, very good demoulding properties and a narrow molecular weight distribution. Products made from SABIC[®] PP 576S typically have low warpage and a high gloss, high stiffness in combination with moderate impact strength at room temperature.

Application: SABIC[®] PP 576S is typically used in caps & closures and thin wall packaging both in food and non-food segments, and appliances.

Health, Safety and Food Contact regulations: Material Safety Data Sheets (MSDS) and Product Safety declarations are available on our Internet site http://www.SABIC.com

The product mentioned herein is in particular not tested and therefore not validated for use in pharmaceutical/ medical applications. This grade material is UL registered under File E111275 (www.ul.com) IMDS 7172624

QUALITY

SABIC Europe is fully certified in accordance with the internationally accepted quality standard ISO9001.

STORAGE AND HANDLING

Avoid prolonged storage in open sunlight, high temperatures (<50 °C) and /or high humidity as this could well speed up alteration and consequently loss of quality of the material and /or its packaging. Keep material completely dry for good processing.
